Biontech®  
THE PERFECT FIT SOLE

I-TECH

35-48

Ref.41451

**How do I use my feet to personalise Biontech®?**

In 3 simple steps, Biontech® permanently adapts to the exact shape of each foot.

**Step 1 Select your footwear**

Select the pair of shoes, trainers or boots into which you are going to put your Biontech® insoles.

**Step 2 Warm the insole**

Put the Biontech® insoles in the microwave, parallel with the writing facing up, and heat at **500 W** or medium power for **40 seconds**.

*Warning: it is important to position them carefully in the microwave and not exceed the stated limits. There may be a danger of overheating.*

**Step 3 Fit the insole**

After **40 seconds**, place the insoles into your shoes and put them on. It is important that you remain standing, exerting pressure on the insoles, for approximately **2 minutes**. We recommend you keep your shoes on for at least **1 hour**, as the insole cools slowly and your footprint will be transferred to the insole.

**Congratulations**

You have just adapted the Biontech® anatomic insole to the shape of your foot.

I-TECH

COOLMAX®  
dermo dry

Woman 36-40  
Men 41-46

Ref.41456

100% BREATHABLE. 100% DRY

Dermodry® Coolmax® inside by mor4n is a technical fabric that speeds up the process of moisture absorption, ensuring the skin is always dry. Moisture is continually drawn to the exterior and never returns to the skin, creating a pleasant and comfortable sensation.

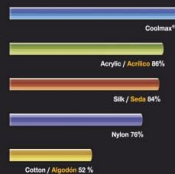

- Moisture control. Quick drying
- Lowers skin temperature
- Reduces cardiac risk
- Soft, light and breathable
- 100% absorbent

DYING RATES after 30 minutes

INDICE DE SECADO

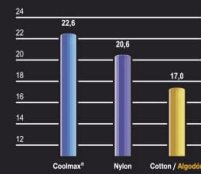

Grupos de 50% humedad

MOISTURE MANAGEMENT

GESTIÓN DE LA HUMEDAD

Acelera la velocidad de absorción de la humedad

Dermodry® Coolmax® inside is a highly resistant fabric and has a wide range of potential uses.

100% TRANSPIRABLE. 100% SECO

Dermodry® Coolmax® inside by mor4n es el tejido técnico que acelera el proceso de absorción de la humedad, manteniendo la piel siempre seca. La humedad se transmite hacia el exterior de forma continuada y no vuelve hacia la piel en ningún caso, lo que da al usuario una sensación agradable y confortable.

- Control de humedad. Rápido secado
- Reduce la temperatura de la piel
- Disminuye el riesgo cardíaco
- Suave, ligero y transpirable
- 100% absorbente

Dermodry® Coolmax® inside es mucho más resistente y amplía las posibilidades de aplicación de este tejido.

Sensação de pele. Qualidade de microfibra. 100% saudável

PERFORMANCE WITH THE ENVIRONMENT:

- 100% microfiber product
- Does not contain Chrome 6
- 100% TOTAL DRY

TECHNICAL CHARACTERISTICS:

- Absorption - Desorption = Total Dryness
- Breathable / Antimicrobial / Does not generate odour
- Thermo-regulating
- Anti-allergy
- Washable (95° without shrinkage or loss of properties)
- Compatible with other textile treatments: Thermo-lex, Water-resistant, Aloe Vera, Anti-static, Eucalyptus, Flame retardant, Stain-resistant, On climatic, Silver ion

Certified by INESCOP according to regulation UNE 20344:2004 (R-09110301)

COMPORTAMIENTO CON EL MEDIOAMBIENTE:

- Producto 100% de microfibra
- Libre de Cromo 6
- 100% SECO

CARACTERÍSTICAS TÉCNICAS:

- Absorción - Desabsorción = Seco Total
- Transpirable / Antimicrobiano / No genera olor
- Termorregulador. Reduce la temperatura de la piel
- Antialérgico
- Lavable (95° sin encoger, ni pérdida de propiedades)
- Compatible con otros tratamientos textiles: Thermo-lex, Hidrófugo, Aloe Vera, Antistático, Eucalypto, Iónico, Antioleoso, On climático, Plata iónica

Certificado por INESCOP según normativa UNE 20344:2004 (R-09110301)
